

## Combien coûte un poste à GE par rapport aux autres lieux d'affectations de l'ONU...

Standard Salary Cost - in thousands of US dollars - 2012 - UN Common System\*\*

**Analyse :** Si on ne considère que les postes de P1 à USG, Genève est en moyenne, par poste (Total Net Salary), plus chère de 21% par rapport à New York, 27% par rapport à Vienne, 29% par rapport à Santiago et 44% par rapport à Nairobi. C'est la composante "Post adjustment" (\*) (=allowances) qui fait la grande différence, avec en un coût d'environ 50% plus élevé que New York et 70% que Vienne. Si la composante "Common Staff Costs" (coût du poste pour le Secrétariat) est ajoutée au "Total Net Salary", l'écart relatif baisse pour New York (+16%), Vienne (+25%), Santiago (+25%) et considérablement pour Nairobi (+24%).

Enfin, relevons que pour les catégories de poste de type administratif qui sont en bas de l'échelle et ne comprennent pas de "Post adjustment" (ex: PL - Principal Level - et OL - Other Level ), la différence entre GE et les autres duty stations se fait au niveau du "Net base salary" et est considérable : un PL ou OL coûtera 80% plus cher à GE qu'à NY, et environ 50% plus cher qu'à Vienne !

\* **Post adjustment** = is designed to ensure that no matter where the UN common system staff work, their net remuneration has a purchasing power equivalent to that at the base of the system , New York. It deals with the relative difference in the cost of living between a specific duty station and the base city, New York. It does not take into account hardship or hazardous conditions, which are dealt with by separate provisions. Post adjustment is computed on the basis of four elements: 1. differences in prices between the given location and New York; 2. local inflation; 3. exchange rate; 4. average expenditure pattern at a given location.

\*\* The **UN common system** represents common standards, methods and arrangements being applied to salaries, allowances and benefits for the staff of the United Nations, those specialized agencies which have entered into a relationship with the United Nations, the International Atomic Agency and a number of other international organizations. The common system is designed to avoid serious discrepancies in terms and conditions of employment, to avoid competition in recruitment of personnel and to facilitate the interchange of personnel. It applies to over 52,000 staff members serving at over 600 duty stations.
